### **INFRINGEMENT OF U.S. PATENT NO. 9,115,078**

25. PRN re-alleges and incorporates by reference the allegations set forth in paragraphs 1 through 24.

27. The invention described and claimed in the '078 Patent is directed to compositions consisting of a single fatty acid for improving the quality of the

meibum composition of inflamed or dysfunctional meibomian glands, wherein the fatty acid consists of omega-3 fatty acids in the triglyceride form in an amount greater than 600 mg. In addition, the compositions disclosed and claimed in the '078 Patent may further include docosahexaenoic acid (DHA) in an amount greater than 500 mg and/or vitamin D in an amount between 500 IU and 2,000 IU.

34. On information and belief, Defendants intend to continue their unlawful infringing activity, and PRN continues to and will continue to suffer irreparable harm – for which there is no adequate remedy at law – from such unlawful infringing activity unless Defendants are enjoined by this Court.

## **COUNT II**

### **INFRINGEMENT OF U.S. PATENT NO. 9,381,183**

35. PRN re-alleges and incorporates by reference the allegations set forth in paragraphs 1 through 34.

36. PRN is the owner of all right, title and interest in the '183 Patent.

37. The invention described and claimed in the '183 Patent is directed to methods for improving the quality of the meibum composition of inflamed or dysfunctional meibomian glands, comprising the steps of: (1) administering an effective amount of omega-3 fatty acids on a daily dosage basis, wherein the omega-3 fatty acids include eicosapentaenoic acid (EPA) in an amount greater than

600 mg and comprising the triglyceride form; (2) increasing levels of anti-inflammatory omega-3's in a composition of meibum of the treated meibomian glands and (3) decreasing levels of inflammatory omega-6's in the composition of meibum. The methods of the present invention may further comprise the steps: (1) improving tear break up time; (2) reducing tear osmolarity and/or (3) improving the quality of tears associated with conditions of dry eye, blepharitis and/or meibomianitis.

38. A copy of a product advertisement for the TEAR SUPPORT PLUS + product as advertised on [www.amazon.com](http://www.amazon.com) is attached as Exhibit C. Referring to page 4, under the header "Product description," it reads, as follows:

Lunovus' Tear Support Plus, Dry Eye Formula not only contains the essential ingredients proven to benefit dry eye, it is also one of the most affordable pharmaceutical grade products. Lunovus's Tear Support Plus, Dry Eye Formula could help to reduce dry eye symptoms, including burning, stinging, redness and intermittent visual disturbances. For this reason, many eye doctors are now recommending Lunovus's Tear Support Plus, Dry Eye Formula for their patients who suffer from dry eyes. Recent studies have found that certain combinations of vitamins, minerals, and Omega-3 fatty acids tend to decrease inflammation and improve tear gland secretions. Lunovus's Tear Support Plus, Dry Eye Formula has specific dosages of key ingredients to help maximize dry eye relief. We developed this formula to treat the core of the problem from the inside out. Many patients may find that they no longer need re-wetting drops although we recommend using both Lunovus's Tear Support Plus, Dry Eye Formula in tandem with the re-wetting drops for maximum benefit.

39. Upon careful review of the Product description of the TEAR SUPPORT PLUS + product, it is clear that Lunovus contends that its TEAR SUPPORT PLUS + product “not only contains the essential ingredients proven to benefit dry eye, it is also one of the most affordable pharmaceutical grade products.” In addition, Lunovus asserts that its TEAR SUPPORT PLUS + product “has specific dosages of key ingredients to help maximize dry eye relief.”

40. Upon review of the “Supplement Facts” for the infringing TEAR SUPPORT PLUS + product (*see* Exhibit C), it is clear that the formulation of the TEAR SUPPORT PLUS + product includes the identical ingredients and dosage amounts as compared to the ingredients and dosage amounts of the formulation of the compositions disclosed and claimed in the '183 Patent (*see* Exhibit D) for addressing conditions associated with dry eye.

41. Defendants have been and/or are directly infringing and/or inducing infringement of and/or contributorily infringing the '183 Patent by, among other things, making, using, offering to sell or selling in the United States, or importing into the United States, products that are covered by at least one or more claims of the '183 Patent, including, by way of example and not limitation, the TEAR SUPPORT PLUS + product.

42. The activities of Defendants have caused and will continue to cause substantial damage, including lost revenues, to PRN and irreparable injury for which

PRN has no adequate remedy at law. PRN derives substantial revenues from its products that fall within the scope of one or more claims of the '183 Patent. PRN has expended considerable sums of money in developing and marketing this technology. The existence in the market of the Lunovus' TEAR SUPPORT PLUS + product is causing, and will in the future cause, substantial damage to PRN. In order to prevent further irreparable harm, PRN seeks a preliminary and permanent injunction and requests that the Court promptly schedule a trial on the merits.

43. Upon information and belief, Defendants' infringement of one or more of the '183 Patent is willful and deliberate, entitling PRN to enhanced damages and reasonable attorney fees and costs.

44. On information and belief, Defendants intend to continue their unlawful infringing activity, and PRN continues to and will continue to suffer irreparable harm – for which there is no adequate remedy at law – from such unlawful infringing activity unless Defendants are enjoined by this Court.

46. This cause of action arises under §43(a) of the Lanham Act, 15 U.S.C. § 1125(a).

47. On information and belief, Defendants copied the ingredients and dosage amounts of PRN's patented OMEGA BENEFITS® product, sometimes also referred to and promoted as PRN's patented DRY EYE OMEGA BENEFITS product, to produce the infringing TEAR SUPPORT PLUS + product, which assertion is supported by the "Supplement Facts" label for the infringing TEAR SUPPORT PLUS + product (*see* Exhibit C), which includes the identical ingredients and dosage amounts as compared to the ingredients and dosage amounts of the "Supplement Facts" label of PRN's patented OMEGA BENEFITS® product, sometimes also referred to and promoted as PRN's patented DRY EYE OMEGA BENEFITS product (*see* Exhibit D).

48. However, Defendants' advertisement for the infringing TEAR SUPPORT PLUS + product on [www.amazon.com](http://www.amazon.com) recites, under the "Product

description” header – “We developed this formula to treat the core of the problem from the inside out.” *See* Exhibit C, page 4. On information and belief, this statement is falsely advertising that Defendants developed the formula for the TEAR SUPPORT PLUS + product, when in fact, the formula was copied from PRN’s patented OMEGA BENEFITS® product, sometimes also referred to and promoted as PRN’s patented DRY EYE OMEGA BENEFITS product.

49. 54. By committing the acts alleged herein, Defendants are guilty of unfair competition and false advertising, in violation of the Alabama common law of unfair

competition, causing a likelihood of confusion and deception of members of the trade and public and, substantial injury to the public and to Plaintiff. Plaintiff is entitled to recover Defendants' profits, actual damages, enhanced profits and damages, costs, and reasonable attorneys' fees to the extent available at law pursuant to Alabama common law of unfair competition.

### **COUNT V**

#### **STATE STATUTORY UNFAIR COMPETITION AND UNFAIR AND DECEPTIVE BUSINESS AND TRADE PRACTICES**
